¿WHERE ARE WE?

¿WHO ARE WE?

We are Fundo Sofruco Alimentos, part of the Sociedad Agrícola La Rosa Sofruco holding, founded by the Ossa family.

Today, it is the sixth generation of the family who leads the company, imparting all the wisdom passed down by their ancestors to the land. In this way, we ensure that we provide all our customers and consumers with **NATURAL AND HEALTHY** products that are carefully selected to ensure their **QUALITY**. We offer the following products from our fields:

**FRESH  
FRUITS**

**NUTS AND  
DRIED FRUITS**

**JUICES**

Each of these products is located in Peumo, the Sixth Region, where there are over 13,500 hectares of land ideal for our crops.

# OUR VALUES

A close-up photograph of several ripe, orange-colored fruits hanging from a tree with green leaves. The image is slightly blurred, giving it a natural, organic feel.

100% NATURAL

A photograph of an orchard landscape. In the foreground, there are rows of trees with white blossoms. In the background, there are green hills under a clear sky.

QUALITY

A close-up photograph of several ripe, orange-colored fruits hanging from a tree with green leaves. The image is slightly blurred, giving it a natural, organic feel.

SUSTAINABLE VISION

A photograph of a landscape featuring several tall palm trees in the foreground. In the background, there are mountains under a clear blue sky.

# PALMERÍA DE COCALÁN

The La Palmería de Cocalán National Park, located in the VI Region of Libertador Bernardo O'Higgins, Chile, is one of the largest natural reserves of the Chilean Palm (*Jubaea Chilensis*), which has been declared endangered for several years.

This wonderful park is an integral part of our company, and we are committed to the conservation, preservation, and care of its incredible and diverse flora and fauna.

The Chilean Palm can live for over 2000 years and reach heights of over 30 meters. The La Palmería de Cocalán is the second national park with the highest number of palms in the country, with over 40,000 specimens that bring life to a magical and unique place. We work day by day to preserve this corner of the earth for future generations; that is our commitment.

NUTS

A photograph of an orchard with rows of fruit trees. A person is visible on a ladder in the background, reaching into a tree to harvest fruit. The scene is bright and sunny, with green leaves and some ripe fruit visible. The text 'FRESH FRUIT' is overlaid in a large, white, hand-drawn style font.

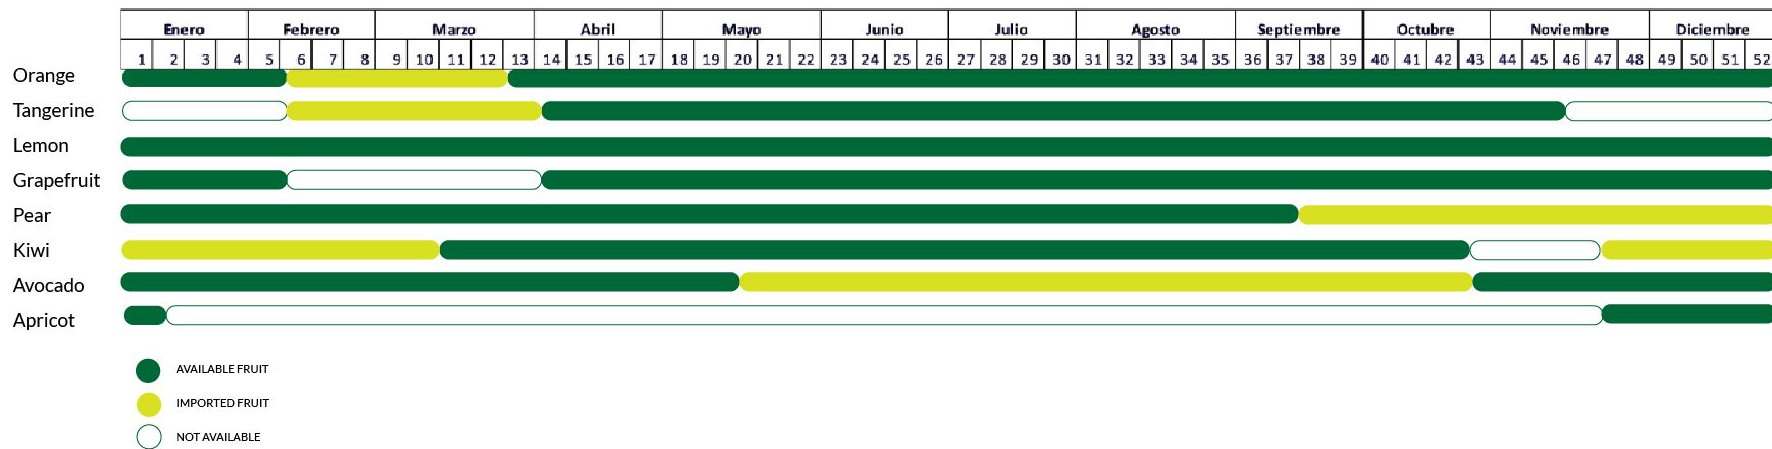

# FRESH FRUIT

We are producers and marketers of fresh fruit. Our products are located in Peumo, where we currently have over 2,000 hectares of cultivated fields with a diversity of options in fresh fruit. Throughout our journey, we have pursued fruit quality as one of our fundamental pillars, which has allowed us to maintain and consolidate our relationships with customers over time.

# JUICES

One of the main differentiators of Frundo Sofruco juices is that they are made from freshly squeezed fruit, maintaining high quality standards in all our processes to create 100% natural and healthy juices with a rich vitamin content. Most of our available flavors come directly from the harvests of our fields, selecting the best fruit at its perfect ripeness and ensuring its quality, making us a pioneering company in citrus production in Chile.

To achieve our juices, we squeeze the fruit in our own facilities, using the best available technologies, thus ensuring the quality of the process at all times. We also employ Ultra High Clean (UHC) technology for packaging, which guarantees an environment free of contaminants.

The background of the image shows a wooden bowl filled with dark, wrinkled dried plums. To the right, there is a purple and white bag of 'Fundo Sofructo' dried fruit, which also features an illustration of a tree with a ladder. Several individual dried plums are scattered on the wooden surface in the foreground.

# DRIED PLUMS

Our dried plums are characterized by their excellent attributes of size, color, and, above all, their sweetness. These characteristics are achieved through the tireless passion of our people for this noble fruit and the generosity of our fertile soils. The harvest typically begins in the first days of February. We have developed techniques to maintain a consistent harvest speed while also ensuring the preservation of the tree, which is our main asset.
